

Client Communication : Anti-Nuclear Antibodies Testing Update

Issue Date: August 27, 2021

Effective Date: August 30, 2021

To better address departmental processing changes due to supply shortages associated with performing Blood Cultures within the Microbiology Department at ProMedica Pathology Laboratories (ProMedica PathLabs), there is an urgent need to move testing related to Anti-Nuclear Antibodies to our Sonic Healthcare affiliate, Clinical Pathology Laboratories, for the duration of a few months.

Due to the above-mentioned change, there may be an analytic time increase of one additional day for Anti-Nuclear Antibodies and related testing to be completed.

For test code 75004, ANTI NUCLEAR ANTIBODIES, the specimen will now require 2mL of serum, instead of 1mL of serum which has been previously required.

In addition, there are some EMR Interfacing Mapping changes, as highlighted in yellow and further detailed on pages 3 and 4 of this Client Communication, which need to be made for those with established interfaces. Please review the information and make changes as applicable to your practice/facility.

Our online Test Directory will be updated for these changes beginning August 30, 2021. In addition, this Client Communication will be posted to our website shortly.

If you have any questions regarding this information, please contact our Customer Service Department at 419-291-4414 / 833-960-0241 or your Account Executive.
Thank you.

Thank you for supporting ProMedica Pathology Laboratories.
