Test Updates Effective May 23, 2022

Pathology Laboratories, Inc. (PathLabs) is in the process of making updates to approximately 50 Cytology and Histology tests, which will be effective Monday, May 23, 2022, as disclosed in the chart provided herein.

The test updates include changes for certain tests in the following areas:

- EMR Mapping and LOINC codes
- Revised Result Fields and Test Names
- Transport Temperatures
- Inactivated Codes
- Notes
- Ordering Instruction/Information
- Other Miscellaneous Information

The enclosed listing, containing specific information as to our modifications, is categorized by department and presented chronologically by Order Code; such as PAP Test Codes (page 3), Molecular Test Codes (page 6), Surgical Pathology Test Codes (page 11), and Inactivated Test Codes (page 13). All changes are marked in **bright blue**.

For greater clarity, our Cytology/Histology Requisition, which includes Molecular Testing, has also been updated to reflect these changes and that is attached for reference (page 14).

Highlights of the updates are as follows:

- **HPV Reflex Testing:** The ThinPrep "out of vial" HPV reflex Order Codes are updated on our Cytology/Histology Requisition, copy attached. New HPV reflex Order Codes are compatible with all interfaces for ease of reporting results.

- Selection of Roche or Aptima Hologic for HPV Testing:
For an interim period, Cytology, Histology and Molecular testing will transition from Pathology Laboratories/ProMedica-Toledo Hospital to Clinical Pathology Laboratories (CPL) in Austin, TX, our Sonic reference lab affiliate. CPL offers HPV testing through both Roche and Aptima (Hologic) methods. It is important to be clear and delineate on the Cytology/Histology Requisition, or any other EMR requisition that a client may be using, which testing method is preferred, Roche or Aptima (Hologic). If the specific method is NOT selected, the lab is required to phone your office to validate your choice. As such, please assure ALL orders for HPV testing specify either Roche or Aptima (Hologic) for timely resulting.
- Molecular Testing: The Cytology/Histology Requisition, copy attached, also reflects updated descriptions for testing with the SimpleSwab™ Orange or White Aptima swabs. Updated Order Codes with a description of testing are as follows:
 - SimpleSwab™ Orange or White Aptima Swab:
 - 1994 -Chlamydia/N. Gonorrhoea/Trichomonas (CT/NG/TV) for endocervical swab
 - 2007-Trichomonas (TV) for endocervical swabs
 - 2008- Chlamydia/N. Gonorrhoea/Trichomonas (CT/NG/TV) for males only
 - 99016-Chlamydia (CT) - can be tested with Orange or White Aptima swabs
 - 99017-Gonorrhoea (NG) - can be tested with Orange or White Aptima swabs
 - SimpleSwab™ Orange Aptima Swab:
 - 2006 -Trichomonas - vaginal swab only
 - 2009 - Profile has been created for testing Chlamydia/N. Gonorrhoea/Trichomonas (CT/NG/TV) from SimpleSwab™ Orange Aptima vaginal swab.
- Inactivated Codes: Certain test codes were inactivated as those procedures are available through other ordering options.

Our online test directory will reflect this information on the effective date of these changes, May 23, 2022.

This Client Communication will be posted to our website for reference.

Please review the information and make changes as applicable to your practice/facility. If you have any questions, please contact our Customer Service Department at 419-291-4414/833-960-0241 or your account executive. Thank you.
